Spreading Smiles throughout the World

Grant Assistance for Grass-Roots Human Security Projects

From the People of Japan

Ministry of Foreign Affairs of Japan
The “KUSANONE” program spreads joy throughout the world.

Going to school, receiving medical treatment at a hospital, drinking clean water, and living in a safe area without land mines……
There are many countries and regions throughout the world where the residents cannot live under such decent conditions.
In order to directly connect with people living in such areas and supply them with what they truly need, it is necessary not only to provide assistance through the governments of developing countries and international organizations, but also to cooperate with a wide range of community-based organizations working at the grass-roots level.

It is with this perspective in mind that the Grant Assistance for Grass-Roots Human Security Projects (KUSANONE) was established.

Although each project may be small in scale, it is Japan’s unique assistance program to meet the diverse needs of local communities by directly supporting the development activities run by NGOs and local governments, rather than by national (central) governments.
This program is unique to Japan, so it is called “KUSANONE” to reflect its Japanese name.

The KUSANONE program aims to achieve a world where no one is left behind and all people can live with peace of mind by “promptly” holding out a hand to “every single person” in “every corner”.

Over the 30 years since the program was established, we steadily expanded the types of support provided, and now our grants currently support initiatives in 141 countries and one region.

Many smiles and words of gratitude which we have received in return from program beneficiaries are manifestations of our efforts.
We intend to continue to expand the KUSANONE program and spread joy throughout the world.

The Grant Assistance for Grass-Roots Human Security Projects is commonly referred to as “KUSANONE” in Japan.
“Kusa” means “grass” and “Ne” means “roots” in Japanese.
The KUSANONE, which started as the “Small Scale Grant Assistance” program in 1989, will be celebrating its 30th anniversary in 2018. Over these years, the grant program continued to be carried out, even as the name changed to “Grant Assistance for Grass-Roots Projects” in 1995 and then to the current name in 2003. Compared to the outset, the number of projects implemented, the number of countries funded, and the grant amounts have increased significantly. Japan will continue to forge ahead with people around the world through these activities, which will mark 30 years in 2018.

**KUSANONE’s 30 Years of History**

- **1989**: Initiated activities in 32 countries
- **1992**: Introduced “KUSANONE for Anti-Personnel Landmine counter measures” scheme
- **1995**: Changed name to “Grant Assistance for Grass-Roots Projects”
- **1998**: Celebrated 10-year anniversary
- **1999**: Introduced “KUSANONE for Public-Private Partnership” scheme / Reached milestone of funding projects in over 100 countries
- **2002**: Reached milestone of funding over 10,000 projects
- **2003**: Changed name of program to “Grant Assistance for Grass-Roots Human Security Projects”
- **2008**: Celebrated 20-year anniversary
- **2009**: Reached milestone of funding over 20,000 projects
- **2016**: Introduced “KUSANONE for Recycling” scheme & “KUSANONE for Micro Credit” scheme
- **2018**: 30th anniversary

**Changes in KUSANONE Budget & Number of Projects Funded**

- Total Budget Amount (Billion Japanese Yen)
- Number of Projects Funded

Islamic Republic of Iran
Recipient Organization: Khouzestan Province’s Education Office

In this village where nomads reside, school classes were often held outside and in tents. Hence improving the educational environment was an issue that needed to be addressed.

We offered support with prefabricated school houses that are both sturdy and capable of quickly achieving their purpose. Nomadic children are now able to attend classes indoors, in a safe environment, even when it is windy and rainy outside.

Democratic Republic of the Congo
Recipient Organization: Women’s Association for Total Development

Image of the area before we provided support for constructing a water well. Locals were using unsanitary river water and were walking several kilometers to get water at the closest well.

Image of the handover ceremony. As soon as we conducted the ceremonial tape cutting, locals rushed to fill their bottles with water. They expressed great joy over being able to drink safe water.

Islamic Republic of Pakistan
“The Project for Expansion of Primary School in Lashora, Khyber Agency, FATA”, FY2013
Recipient Organization: (Local NGO) LAMP (LAMP: Learning Awareness and Motivation Programme)

In this FATA community, which is one of areas of Pakistan where development is most delayed, children were forced to go to school outdoors. With our support, children started having classes inside of a school, and their parents were greatly relieved.

Recipient Organization: Fua’amotu Village Water Committee

Republic of Kenya
“The Project for the Renovation of a Maternity Ward at Kiptulwa Dispensary”, FY2014
Recipient Organization: Kiptulwa Dispensary

Due to the aging of the water supply facilities that were installed in 1986, supply cut-off and other issues often occurred. However, after upgrading the facilities, there is a stable and sufficient supply of water.

Unable to keep up with processing the large amounts of waste that are generated, foul smells, insect damage, and other problems started to emerge. To respond to these problems, we implemented a recycling project to improve the locals’ capacity to collect and process waste themselves. Recycled products, such as the one shown in this image, are becoming popular amongst the locals.

These are the freshly built classrooms after we provided support. The students are now able to attend class in a safe and learning-friendly environment. On the day of the completion ceremony, the children waved Japanese and El Salvadorian flags and expressed their gratitude and admiration towards Japan.

The KUSANONE is a framework that essentially supports local NGOs and local public organizations that are working in eligible countries and regions, rather than the governments of those countries, in order to respond to various development needs in a prompt and precise manner, but on a comparatively small scale.

Eligible Recipients

1. NGOs working in developing countries (including local NGOs and international NGOs; in principle Japanese NGOs who are eligible for Grant Assistance for Japanese NGOs are excluded)
2. Nonprofit organizations such as local public organizations, educational institutions such as primary and junior high schools, and medical institutions
3. Nonprofit organizations that implement development projects at the grass-roots level in eligible countries
4. Individuals and profit organizations are not eligible

Eligible Countries & Regions (as of October 2017)

141 countries and one region (Palestine)

Project Areas

The KUSANONE mainly covers tangible improvements, such as constructing primary and junior high schools, improving fundamental medical equipment at hospitals, and excavating wells, etc. However, intangible improvements such as capacity building amongst people may also be eligible for support if determined to be important.

The following areas are not financed by the KUSANONE:
* Projects for assisting research at advanced academic institutions and projects for improving the capacities of the recipient organization itself
* Projects that are limited to commercial activities and creation of employment of particular individuals and organizations, and where the direct benefits for grass-roots activities are uncertain
* Projects that are not closely related to economic and social development (such as culture, arts, and sports related projects)
* Projects with a political or missionary purpose or the intention of military use
* Even if a project is eligible for the KUSANONE, consumables, small fixtures, and running and maintenance costs of facilities and equipment, etc., are not financed

Maximum Grant Limit

Standard limit: 10 million Japanese yen Max. limit under certain conditions: 100 million Japanese yen

KUSANONE Flowchart
Public-Private Partnerships Achieved through Cooperation between Japanese Companies and NGOs, etc.

This is a scheme in which public enterprises partner with Japanese companies in initiatives that are of high public interest to both heighten development effects and improve recognition of the company, as well as contribute to improvement of the environment where activities are carried out and economic and social development in developing countries, etc.

Grant Activities through Partnerships with Local Governments of Japan

This is a scheme in which the skills and knowhow that Japan’s local governments possess are put to use to expand the horizons of local governments who are working to promote international cooperation, and to contribute to economic and social development in developing countries.

<td>When support is for civilian government institutions, consult the overseas mission.</td>
</tr>
</tbody>
</table>

Recycling

This is a scheme in which second-hand equipment* from Japan is reused in recipient countries, with the aim of contributing to economic and social development there, and the related transportation expenses and servicing costs are covered.

* Second-hand equipment includes used fire engines, ambulances, garbage trucks, and school desks and chairs, etc.
